Facts of a Newspaper Article

Newspaper articles have 5 important parts to them:

- **Headline:** The name of the article or publication.
- **Pictures:** A heading that tells what's going to happen in the story. Usually in bold and a large font.
- **Lead:** The first paragraph of the story. Tells who, what, when, where and why of the story. Also tells how, sometimes.
- **Body:** The rest of the story. Tells the rest of the information that is important to the story. Also tells about the other people who were involved in the story. Usually has quotes from the people involved in the story. Also includes other information that is important to the story. This is the most detailed part of the story. The most important information is at the top. The least important information is at the bottom.
- **Tail:** Tells the ending of the story. Usually has a quote from someone involved in the story. Also tells what will happen next in the story.

Additional information: Headlines, starting from the bottom (more when he was 10 years old) to the top (when he was 18 years old) are getting bigger and bigger. Also, as you read from the top to the bottom they are getting smaller and smaller. Pictures are usually in the middle of the story. Leads, and lead have moved in and changed a lot because of the past. It was known to be the most difficult story in the world to navigate successfully.

High flying sewage ends in death

Byline: By Kate Bevan, age 14

Publication: LONDON – Today, one of the famous sewers, Theodora Jackpaul 24, was overcome by sewage fumes while working in the Victorian sewer in Hackney and died.

Police and fire officials made rescue from sewer, but found Theodora Jackpaul unresponsive. Theodora Jackpaul was pronounced dead at the scene of the accident. Theodora Jackpaul's colleagues were treated for the fumes at the local hospital. Theodora Jackpaul's colleagues are recovering well from the fumes. As a result, the task needed the sewer to be cheap which caused the fumes. Theodora Jackpaul's family are being supported by counselors and friends.

"She was my best friend," said Theodora Jackpaul's colleague Jane Smith. "We had been working in the sewer for two years and we had become very close. She was always so cheerful and kind. I can't believe she's gone." Theodora Jackpaul's colleagues are recovering well from the fumes. They are expected to be released from the hospital tomorrow. Theodora Jackpaul's family are being supported by counselors and friends.
